

CHAPTER 14

REFERENCES: RESEARCH PARTICIPANTS

PARTICIPANTS IN RESEARCH ACTIVITIES

This was a field-based and participatory study and in the table below each site is enumerated in bold with a list of those who participated with name, organisation, contact number (when available) and their role in the research process. At most sites this included site inspections, a full-day interview with community prosecutors and half-day workshops with the project partners at each site although some additional focus groups were held in Siyahlala. The term ‘workshop’ in the charts below refers to a half-day of round-table discussions, stakeholder questionnaires and informal interviews. Documentation and other source material from the sites was also utilised but referenced in the report using footnotes.
